-110.93500
Notes

Skier triggered avalanche in Argentina Bowl on Saddle Peak. Observed from the highway. Occurred during the day on Wednesday, 1/15/2020.

From e-mail: "Skiers triggered two separate slides on south Saddle this afternoon. we witnessed the smaller [slide](#) to the lookers right of the big [slide](#), the bigger one happened later apparently... The first smaller [slide](#) was caused by a [ski cut](#) near the trees, [fracture](#) was about 2 feet, soft [slab](#) that seemed to run on a thin [sun crust](#). below the [sun crust](#) was also very weak and sugary. Not sure when the second skier went farther out and triggered the whole bowl, but they got lucky!!"

Number of slides
1
Number caught
1
Number buried
0
Avalanche Type
Soft slab avalanche
Trigger
Skier
