

Cracking and small natural slides in S. Gallatin

SOUTHERN GALLATIN RANGE

Southern Gallatin

1/6/2021

Code

Aspect

W

Latitude

45.04320

Longitude

-110.96200

Notes

"...the snowpack was talkative today. Tons of energetic rolling collapses that shook snow out of the trees 50 feet away, and shot powder up around aspens in a Colorado-esque way. Shooting cracks on low-angle test slopes, and isolated small natural slides on steeper, W-facing terrain."

Number caught

0

Number buried

0

Problem Type

Persistent Weak Layer
