## **Cracking and Collapsing, Cooke City**

Republic Creek Cooke City 1/19/2021 Code Latitude 44.98550 Longitude -109.94100 Notes

From Obs: "On a W facing slope in dense trees just east of the Republic Creek skin <u>track</u>, 8200" - 9200". Snow was not wind loaded at all. There was a buried <u>weak layer</u> about a foot below the new snow, but the new snow had not formed a <u>slab</u> so <u>stability</u> seemed good. There was one incident of a <u>collapse</u> crossing a small gully at about 40deg, a crack formed but did not slide probably due to no wind loading."
