## Natural avalanche below Saddle Peak

Date

Tue, 12/27/2022 - 09:35

On 12/28/2022 from the lower south boundary of Bridger Bowl, ski patrol saw an old avalanche crown and debris on steep rolling terrain below the large cliffs on Saddle Peak. Appeared to be 1-2 days old, 2 feet deep and 60 feet wide, N-R2-D2-O

Region Bridger Range Location (from list) Saddle Peak Observer Name Alex Marienthal
