Notes

Observed two recent natural avalanches on 1/25/23 that broke 1-2 feet deep, presumably on a [surface hoar](#) layer. There was a couple of inches of snow on each of these slides, so I would place them between three and five days old. The slides were R1-D1.5 in size - 75-100' wide, 1-2' deep, and 100' vertical fall.
