

Slide on north face of blackmore

Date

Wed, 02/15/2023 - 11:45

Activity

Skiing

Light winds when I was up there with little to no wind effect on the east face. Saw this slide with an 8-12in crown and 100ft wide on the north face, didn't see any other activity besides some point releases on really steep east aspects.

Region

Northern Gallatin

Location (from list)

Mt Blackmore

Observer Name

Ben Farrell
