

Shooting crack in Tepee

Date

Thu, 01/25/2024 - 01:35

Activity

Snowmobiling

From email: "A friend and I were riding in lower Tepee today, staying on low angle terrain because of the current avalanche conditions. When side hilling on a 24 degree slope, I saw cracks shoot out approximately 100 feet around me. It was a smaller slope, but things are still pretty sensitive. This was a north facing slope in a valley that shouldn't have been too wind loaded. "

Region

Southern Madison

Location (from list)

Tepee Basin

Observer Name

Jim Norlander
