

Mount Blackmore

Date

Fri, 12/13/2024 - 09:40

Activity

Skiing

Toured up Blackmore via the south ridge this morning. Winds overnight drifted snow over old tracks and skin tracks around the area. Once on the ridge, I noticed active wind loading on eastern aspects as well as cornices growing along ridge lines.

Region

Northern Gallatin

Location (from list)

Mt Blackmore

Observer Name

Tommy S
