

Remote Cornice Trigger and Propagation in Lionhead

Date

Mon, 12/30/2024 - 00:15

Activity

Skiing

While touring up a low-angle ridge in the northern Lionhead, I experienced several large collapses, notably one that triggered a cornice fall from 50' away. Another remote collapse caused about 500' of an E facing bowl to propagate, but not slide. ~9200' E-SE

Region

Lionhead Range

Observer Name

Nick Sramek
