Little Ellis - Unconsolidated all the way down

Date
Sat, 01/04/2025 - 09:35
Activity
Skiing

Little Ellis now has (barely) enough cover to be skiiable (at least up high - still marginal lower down). Dug a pit on the NE aspect 100 yard NE of the summit. Found unconsolidated snow all the way down to the ground (roughly 36" deep). Negative ECT.

Region
Northern Gallatin
Location (from list)
NORTHERN GALLATIN RANGE
Observer Name
Mark Egge
