

Snow Pit Profile  
**Goose Creek**  
**Beartooth, MT**  
Elevation (ft) **9567**  
Aspect: **340**  
Specifics:

Observer: **Mark Staples**  
**Tue Dec 17 12:45:00 MST 2013**  
Co-ord: **45.08220 N 109.94079 W**  
Slope: **26**  
Wind loading: **no**

Stability on similar slopes:  
Air Temperature: **C**  
Sky Cover:  
Precipitation:  
Wind: **Calm**

Stability Test Notes:  
**103: popped out**

Layer note:  
**103-104: F**

Notes: See pit from 11-27 in this area at: [http://www.mtavalanche.com/images/13/goose-creek-pit?size=\\_original](http://www.mtavalanche.com/images/13/goose-creek-pit?size=_original) We found surface hoar on Henderson Died. It was at the exact same location. HS there was 165cm and stability test result was ECTP17/13. All other layers in this pit felt solid and it was easy to miss the surface hoar without a stability test.

Advisory Region  
Cooke City
